

Resource Central Catalog

Over the next 24 months, Resource Central plans to move its publications over to a new user group. Five pages of this catalog have been dedicated to getting that group on its feet. The last three pages are Resource Central's standard catalog. Call us at 913-469-6502! **Spring 1994**

Any computer plugs into this network!

Join ICON now!

The International Computer Owners Network — a world-wide user group

ICON is a non-profit computer user group being launched under the sponsorship of Resource Central. We'd like you to join us!

ICON's Mission

ICON's mission is to educate the public about computers and related technologies. ICON's publications, online forums, and seminars provide basic and continuing education as well as channels for the exchange and dissemination of information.

ICON's Activities

Monthly Disks

ICON publishes inexpensive monthly disks for Apple II, Macintosh, MS-DOS, and Windows users. Each disk is designed to educate computer users by means of tutorials, feature articles, news summaries, tips and tricks, and access to the best freeware and shareware to appear in the last month. ICON's editors winnow out the chaff so you can stay wise about the best of what's new for just a few dollars a month.

ICON's monthly disks are available by subscription or by purchasing disks from our back issue library. Subscribers automatically become ICON members. Monthly disk subscriptions are the primary source of ICON's income — by subscribing you support the group as well as save yourself time and money!

Special-Interest Disks

ICON also publishes disks every-other-month for members with special interests. Currently special-interest disks are published for Apple II users who use *AppleWorks*, *HyperStudio*, or *HyperCard*, and for Macintosh users who use *HyperStudio*. Moreover, publishing additional special-interest disks is at the heart of ICON's mission. If you would like to start and manage a special-interest disk, please contact us.

Like ICON's monthly disks, special-interest disks are available by subscription or from our back-issue library. Subscribers to special-interest disks automatically become ICON members.

ICON Online

An international user group would be unthinkable without electronic information highways to shrink the world down to a manageable size. ICON has official forums for the Apple II, Macintosh, and PowerPC on

GENie, General Electric's internationally-available online service. ICON's forums are open to the general public and include active bulletin boards, packed software libraries, and frequent real-time conferences. An ICON special-interest group for Apple II users, called PAL, already meets monthly online.

Help ICON

Help ICON is a volunteer program in which members help the public and other members with computer problems on a person-to-person basis. If you're available to help, let us know your areas of expertise. If you need help, let us put you in touch with a member close to you.

ICON Summer Conference

This year, ICON's summer conference will be held July 21-23 in Kansas City. The conference is held at a small college. Attendees can stay in the dorms and eat in the cafeteria or they can stay at local hotels. Members give seminars on various aspects of using computers. This is a great time to meet and learn from fellow ICON members.

Member Benefits

ICON's educational materials are available to the general public, however, there are advantages to supporting ICON's activities by becoming part of our world-wide community of members. The benefits of ICON membership include:

Ahs

Our quarterly newsletter, *Ahs* (rhymes with Oz), is written by Tom Weishaar, ICON's executive director, and will keep you up-to-date with ICON's activities and the larger world of computing. It's small enough that you'll actually have time to read it.

Back Issue Library Discounts

ICON members can get disks from our back issue library for just \$3 each, 40 per cent less than the non-member price of \$5 each.

Volunteer Opportunities

ICON members have many opportunities to provide important and meaningful help to the public and other members through our *Help ICON* volunteer program, our online activities, our summer conference, and our monthly and special-interest group disks.

System Software Upgrades

ICON members can get system software upgrades for just \$3 a disk under the provisions of our user-group license with Apple Computer:

		# disks	price
IC-004	Apple II: ProDOS 8 v4.0.2	2	\$6.00
IC-005	Apple II: GS/OS v5.0.4	2	\$6.00
IC-006	Apple II: GS/OS v6.0.1	6	\$18.00
IC-106	Macintosh: System 6.0.8	4 800K	\$12.00
IC-107	Macintosh: System 7.01	8 1.4M	\$24.00

How to join us

Membership fees are included in the price of monthly and special-interest disk subscriptions. Subscription payments are ICON's primary source of financial support.

Disk subscriptions

The standard rate for ICON's monthly disks is just \$5 each (\$59.95 a year). The price includes airmail delivery world-wide. Or you can save \$10 each year by selecting ICON's special auto-renewal rate (\$49.95). When you ask for auto-renewal, you pay by credit card — a few days before we send your last issue, ICON will renew your subscription for you and charge the renewal to your credit card. ICON's monthly disks include:

For Apple II users: A2-Central
For Macintosh users: Macrocosm
For Windows users: Solid Windows
For MS-DOS users: Config.sys

Special-Interest Disk subscriptions

The standard rate for ICON's special-interest disks is \$49.95 a year (\$39.95 under the auto-renewal program). Again, the price includes airmail delivery world-wide and ICON membership. We are looking for individuals who would like to start and manage additional special-interest disks. At this time, ICON's special interest disks include:

Apple II
For AppleWorks users: TimeOut-Central
For HyperCard IIgs users: Script-Central
Macintosh & Apple II
For HyperStudio users: Studio City

Otherwise...

If you aren't interested in any of ICON's disk subscriptions, you can join for just \$8 per year and receive *Ahs* and all the other benefits of membership.

The Best of What's Hot...

Monthly Disks

A2-Central

12 Issues Per Year
One 800K 3.5" disk per issue
\$59.95 a year (\$5/disk)
\$49.95 auto renew (\$4.17/disk)

Config.sys

12 Issues Per Year
One 1.4 Meg 3.5" disk per issue
\$59.95 a year (\$5/disk)
\$49.95 auto renew (\$4.17/disk)

Macrocosm

12 Issues Per Year
One 1.4 Meg 3.5" disk per issue
\$59.95 a year (\$5/disk)
\$49.95 auto renew (\$4.17/disk)

Solid Windows

12 Issues Per Year
One 1.4 Meg 3.5" disk per issue
\$59.95 a year (\$5/disk)
\$49.95 auto renew (\$4.17/disk)

...and the lowest
price possible...

Join today and
learn!

There's no less expensive way to learn about and stay current with the quickly changing universe of computer technology than ICON's on-disk publications. Not only do you get full-text articles and tutorials like traditional computer publications, you also get actual software you can use to learn by doing.

But best of all, you become a part of our world-wide network of computer users. Now you'll have friends to rely on (and who will rely on you) for help with those ticklish situations.

Subscriptions to ICON's disk publications are its primary means of financial support. By subscribing you not only give yourself access to great disks for your computer, you become a member of ICON at no additional cost. Help us and help yourself — subscribe to one of our disk publications today!

For exact descriptions of what kind of material is in each publication, see the back issue library listings on the next three pages. Since **Config.sys** and **Solid Windows** are new publications, they are unlisted, but the content will resemble that of **A2-Central** and **Macrocosm**.

About Auto-Renewal

ICON doesn't have multi-year subscription rates for any of its publications. You choose whether to pay the standard 1-year rate or, if you prefer, pay by credit card and ask to be in ICON's automatic renewal program. A few days before we send the last issue of your initial subscription, we'll renew your subscription for you and charge the renewal to your card. *You'll have no renewal junk mail, no need to buy stamps or make phone calls, no double payments, no missed issues, you'll pay just one year at a time, and you'll get our best subscription rate. And you can cancel at any time and get a refund on outstanding issues.*

The Best of What's Cool...

A2-Central

- Each issue of **A2-Central** consists of one 800K 3.5 inch disk. **A2-Central** is not available on 5.25 inch disks.
- In order to fit the maximum amount of material on each disk, many files have been compressed. To use these files, you must uncompress them with **ShrinkIt**. To access everything on the disk, you will also need a program that can read text and **AppleWorks** word processor files. If you don't already have these, they are available on the **A2-Central Starter Disk** (see below).
- Each issue contains feature articles, letters from readers, an introduction to the items on the disk written by the disk's editor, and more items than can be listed below. **What you see in these listings is merely the highlights of each disk.**
- Items listed as **Ille/Illc** almost always work on **Ilgs** computers too, however, **Ilgs** items never work on **Ille/Illc** computers. An **NDA** is a **New Desk Accessory**, which can be accessed from within **GS/OS** programs only. A **CDA** is a **Classic Desk Accessory**, which can be accessed from any program that allows you to bring up the **Ilgs** Control Panel.

Starter Disk

All new subscribers to **A2-Central** receive the Starter Disk free. It is available to others for the standard fee (\$3 for **ICON** members, \$5 for others). The Starter Disk is a bootable 3.5 disk that includes the latest version of **ProDOS**, utilities for both blind and sighted users for reading text and **AppleWorks** word processor files, a program selector, utilities for splitting text files into smaller chunks, and the most current **Apple Ille** and **Apple Ilgs** versions of **ShrinkIt**, which is required to unpack the compressed files on the monthly disks.

Also on the Starter Disk is an **AppleWorks** database of all the files that have ever appeared on **A2-Central**.

January 1994

Feature articles: Steve Weyhrich's **A2 News Digest** (will appear exclusively in **A2-Central** from now on), **AppleWorks 4.0 Review and Tips**, by Doug Cuff.

Ille/Illc: **Term Power**: complete explanation of how to solve SCSI terminator power problems; **ProDesk Plus v3.02**: \$20 shareware graphics/text viewer, with file finder, selector, and manager; **FormWorks**: create forms with **AppleWorks**; 7 others.

Ilgs: **Pointless v2.0.3** updater; **NoiseTracker Module Player**; **JumboDesk v2.11** expands your **Finder**'s desktop; **Battleship** game; **Clock Works**: adds the time to your menubar; 11 others.

December 1993

Feature articles: **3D Logo**, **Super Menu Pack**

Ille/Illc: **Disk Inventory**: creates a text file listing of the files in any directory and its subdirectories; **HP LaserJet IIp setup file** for **AppleWorks**; **New Print Shop flowers** clip art; **Scroll It!**: \$10 shareware file selector; **Shaston** font in 16 and 32 points; **Trailblazer**: freeware game.

Ilgs: **Capture Driver**: sends information from printer drivers to a file for debugging purposes; **Cross Purpose**: brain teaser; \$15 shareware **LaserJet IIp** driver for **GS/OS**; **Moria Ilgs v5.3**: the **Ilgs** version of one of those classic computer games that started on a mainframe long ago and far away; **RunQ v4.1**: freeware **NDA** that allows you to quit your current application and start another without returning to the **Finder**; **ShowMe v1.0.5**: **NDA** and **Finder Extra** that allows you view any graphic whenever you like.

November 1993

Feature articles: Getting the most out of your computer.

Ille/Illc: **Computer Keyboarding V**: one of the best typing tutor programs ever produced for the **Apple II**, \$10 shareware; **Sneeze v2.2**: final version of Karl Bunker's overall cool file viewer and launcher for **ProDOS**; **APT.ZAP**: complete file edit utility allows complex examinations and modifications of files at the byte level as well as basic file maintenance operations, \$20.00 shareware; **Don't Fence Me In**: freeware tactical brain-twister that pits you against the computer or another player; **Apple II Crypto**: \$5 shareware game of encrypted phrases.

Ilgs: **Scream Init**: wonderful little toy that makes your **Ilgs** scream at random intervals; **System Icons Init**: gives **Ilgs** file save and load dialogs special new icons; **Mathemusic**: freeware that combines animated abstractions and music in a unique and creative way; **MS-DOS File Utilities**: \$15 shareware **COMMAND.COM**-like set of **MS-DOS** utilities for any **Ilgs** equipped with **System 6.0.1** and either a **PC-Transporter** or an **Apple Superdrive** controller; **Multiview v2.0**: allows users of **The Manager** (see April 93 disk) to see how memory is being used; **QuietDisk Init**: freeware that stops the **System 6.0.1** from polling 5.25 drives all the time; **Shutdown NDA**: lets you shut down your system from an application without returning to the **Finder**.

October 1993

Feature articles: **Mass Storage Overview** **Ille/Illc**: **Baby** and kid-related clip art; **Bad Block Fixer**: freeware utility locks out bad disk blocks on 3.5 disks; **Executioner**: freeware turns any standard **ProDOS** file into an executable text file that can recreate the original file; **Star Trek First Contact**: excellent \$10 shareware game.

Ilgs: **AutoMenus Control Panel**: creates an alternate interface for menu bars; **Fix Font Manager v2.0**: fixes a nasty bug in **System 6.0.1**; **Richard Bennett's** freeware floptical drivers; **Multi GS**: freeware program switcher for **GS/OS**; **Plotting**: very high quality \$25 shareware arcade game.

September 1993

Feature articles: **GS/OS 6.0.1**; **Removable Mass Storage Device Overview**, Part 3 **Ille/Illc**: **Loan Analyzer**; **Overdrive** font; **Raster Blaster** patch (see May 93).

Ilgs: **AppleWorks GS** communications font; **AppleWorks GS** font patch: allows you to use fonts larger than 48 points; **Instant Access**: \$10 shareware small & fast **Finder** replacement; **PMPUnzip v2.0**: \$15 shareware utility extracts files from Zip compression format favored by **MS-DOS** users; **Simple Animation Program v0.7**: allows you to create animations.

August 1993

Feature articles: **System 6.0.1** announcement; **AppleWorks 4.0**; **Removable Mass Storage Device Overview**, Part 2.

Ille/Illc: **Change-A-File**: changes file types, convert files between **Appleworks** and text formats, strips control characters; **Resurrection**: \$10 shareware repairs damaged **Appleworks** word processor and data base files; **File Doctor**: makes **TimeOut** **FileMaster** interface **ProSEL**-like; **Movies Database**: software allows you to track your video tapes, includes about 100 movie reviews.

Ilgs: **PolySons v5.1**: freeware highly advanced sound waveform creation and manipulation utility; **ShadowWrite v1.3**: Andre Horstmann's great little word processor disguised as an **NDA**; **WinFlate v1.21**: "deflates" any window with a click of the mouse.

July 1993

Feature articles: **Removable Mass Storage Device Overview**, Part 1

Ille/Illc: **Checking Account**: freeware personal finance program; **GENie Master v4.21**: classic freeware offline navigator for **GENie**, requires **AppleWorks 3.0** and **ProTerm**, **Talk Is Cheap**, or **Point-to-Point**; **Vigor**: freeware shoot-the-aliens game.

Ilgs: **Apple Rx**: \$20 shareware virus protection program; **Co-Pilot v2.1.1**: freeware offline navigator for **GENie**, requires **ProTerm**, **Talk Is Cheap**, or **Point-To-Point**; **File Passage v2.0**: user-configurable file and disk utilities for **GS/OS**; **Open Anything NDA**; **Thought-for-the-Day** **Finder Extra** for **System 6**.

June 1993

Feature articles: **Some Substance** on **Style**; **Tips on Documenting Software**; **Review: The Lost Tribe**

Ille/Illc: **ACT v3.03**: freeware communications package for 128K computers; food-related clip art; **MS-DOS Copy v1.2**: freeware program allows copying files from **MS-DOS** disks on **Apple IIs** equipped with a **SuperDrive** controller card; **Sound Edit v1.2**: astounding **Ille/Illc** freeware that plays and edits sounds digitized on a **Ilgs** or **Mac**.

Ilgs: **rSounder**: \$5 shareware modifies raw **Ilgs** and **Mac** sound files into **System 6** **rSounds**; **SoniqTracker MOD** player and bonus song "Anette"; demo of **ANSITerm** communications package.

May 1993

Feature articles: **Multimedia Magic** on a **Shoestring**; **Comparison Review: Switch It and The Manager**.

Ille/Illc: **Raster Blaster**: classic commercial game by Bill Budge, now freeware (also see Sep 93 disk); **ProDOS 8 v4.0.1** **System Disk**.

Ilgs: **Cute NDA** collection, including a **Pac-Man**-like game, **Panic**, **Meltdown**, and **Grass**; **Skull cursor**; **ModZap**: freeware music program with bonus song "TechnoConcert"; **ProBoot v5.2**: allows you to select a new boot device without mucking around in the control panel; **Spy Hunter**, great game.

April 1993

Feature articles: **Apple Writer Tutorial**, Part 5: **Word Processing Language**.

Ille/Illc: **AccuDraw** demo: amazing computer-aided-design program for industrial arts programs; **DOS 3.3 Launcher v2.0**, \$10 shareware allows you to copy **DOS 3.3** programs to **ProDOS** disks and run them; **GroundTrack v3.01**: \$10 shareware helps amateur astronomers track visible artificial satellites.

Ilgs: **Bouncin' Ferno**: Dustin Mitchell's incredible response to **Shareware Solution's Bouncin' Ferno** challenge; demo of **The Manager** program switcher.

March 1993

Feature articles: **Life and Times of an Apple II Programmer**; **Apple Writer Tutorial**, Part 4: **Glossaries**.

Ille/Illc: **Hyper C**: the only version of **C** that runs on classic **Apples**; **Intermediate Typing**: great drill and practice game for typing students; **NoSlotClock** fixer for all versions of **ProDOS 8**; **Video Database**; **GENie** conference transcript with Gary Hayman, author of **Magic File Cabinet**.

Ilgs: **Disk Witch**: complete disk utilities in a **CDA**; **DuelTris**: very snazzy one- or two-player **Tetris**-like shareware game; **Othello**: two-player game; **GENie** conference transcript with **Jawaid Bazyar**, author of **Switch-It**, a program switcher for **GS/OS**!

February 1993

Feature articles: **Smarter SmartPorts**; **Apple Writer Tutorial** Part 3: **Built-in Menus**.

ICON Back Issue Library

Ille/Ilc: U.S. and Canadian 1992 tax return templates for AppleWorks; Electric Duet: one-time commercial DOS 3.3 two-voice music creation software by Paul Lutus of Apple Writer fame, now freeware; Gary Nobel's freeware Genealogy software; HFSLink: allows you to copy files from Macintosh disks to ProDOS disks.

Ilgs: Ant Wars: fast action strategy game by Karl Bunker; Richard Bennett's freeware floptical drivers; Pic Librarian: prints out many small graphics on a single page so you can remember what you have; Plasma Lab 2: update to great mathematical life-simulation game; demos of Switch It, Your Money Matters, and Personal Finance.

January 1993

Feature articles: BASIC: The People's Language; Marketing Educational Software, Part II

Ille/Ilc: Andover and Kendall monospaced fonts; Change-A-File: file manipulation and conversion program plus fixes damaged AppleWorks files upon payment of \$10 shareware fee to author; ProBASIC v1.1: commercial Applesoft-derived programming language developed by Alan Bird of Beagle Bros and now released as freeware.

Ilgs: HyperStudio 3.0i runtime and Bo Monroe's PixelTalk #1, a multimedia-based tutorial on Apple Ilgs graphics; Letter Slide: \$10 shareware logic/word game with almost 100 levels.

Macrocosm

- Each issue of **Macrocosm** consists of one 1.4 Meg 3.5 inch disk. **Macrocosm** is not available on 800K disks.
- Each issue of **Macrocosm** contains about 2.5 megabytes of files. You must have this much free space on your hard drive when you open the self-extracting archive on each **Macrocosm** disk. To use the **Macrocosm** navigation stack, you must have the current version of the Apple's HyperCard Player, which we provide to new subscribers on the **Macrocosm Starter Disk** (see below).
- Each issue contains feature articles, letters from readers, an introduction to the items on the disk written by the disk's editor, Apple Press Releases and other news items, and more than can be listed below. **What you see in these listings is merely the highlights of each disk.**
- "Black and White" software will run on any Mac and often supports color on color systems. "Color" software does not work on monochrome Macs.

Starter Disk

All new subscribers to **Macrocosm** receive the Starter Disk free. It is available to others for the standard fee (\$3 for ICON members, \$5 for others). The Starter Disk

includes the latest version of Apple's HyperCard Player and instructions on how to set up your hard disk for **Macrocosm**.

January 1994

Features: Step Away: car-alarm-like security system for your Mac; Back Issue Index
Clip Art: Dinosaurs and bugs
Sounds: Hit me, You're unbelievable, What?
B&W Software: Disinfectant v3.3: freeware virus protection software; Mac a Loan v3.2: interest rate software.

Color Software: Beebop; Floor Tiles
Stacks: Telephone Chronology
Fonts: Cherokee TT; Judas TT
More: More icons for your Finder; Finder-Xtender: go-to folder menu; area code control panel; ManlyMac: lots of fake startup icons; Shutdown FX: special effects on shutdown; Space Shuttle Startup Screen; volume knob menu.

December 1993

Features: Disk/Folder Cataloger; Mac Care tips

Clip Art: Holidays

Sounds: Be Mellow, Clatter, Count to Five, Drip, Printx5, Scissors Cut, Toilet Flush, Whoomp!

B&W Software: DOCMaker v3.96: \$25 shareware creates self-running documents you can distribute to others without worrying about what kind of files they can read; Click There It Is: allows you to move model dialog windows and to click on desktop folders inside open/save dialogs; Contacts v1.4 contact manager; Calendar Desk Accessory; Night Sky screen blanker; Spacestation Pheta arcade game;

Stacks: Home Inventory v2.2;

Fonts: Eviscerate TT, Flintstone TT

More: Icon collection to dress up your Finder; 3D Tic-Tac-Toe; Hangman; Forward Delete; NiceStop ShutDown; Zoom Lens: magnifies any portion of screen.

November 1993

Features: PowerBook info.

B&W Software: Compact Pro: widely-used \$25 shareware file compression/extraction package; Trist: \$5 shareware stone game; Canon: plays soundfiles in background; Shatterball v0.27: \$5 shareware 3D Breakout-type game; TechTool v1.0.3: desktop rebuilder, PRAM zapper.

Color Software: Arashi 1.1 game.

Stacks: Herbal Remedies

Fonts: LowerEastSide, LowerWestSide, UpperEastSide, UpperWestSide.

More: Brownian Motion demo; more Zippies; Laz Life simulation; MacLifeInsurance: automatic file and keystroke savers.

October 1993

Features: Through the Looking Glass, Part 2: Mac vs PC graphics formats

B&W Software: Drop Info: see/edit a file's

filetype and creator; Fortune Teller; Museum: \$5 shareware self-running document creator

Color Software: SuperColumns: Tetris-like game.

Stacks: Hangman

Fonts: Faganplate TT, Jungend TT

More: DragAnyWindow: \$5 shareware; Startup weekday announcer; Zipple v1.6.1: allows you to change and animate Apple icon in menu bar; Remember: reminds you of important dates; Fun House & Looking Glass: interesting screen effects; Mouse-o-meter: shows x,y mouse position in any program; Sieve CPU speed tester.

September 1993

Features: Through the Looking Glass, Part 1: Mac vs PC graphics formats

B&W Software: DiskDup+ v2.21: \$20 shareware disk duplication utility; BBEEdit Lite: industrial-strength freeware text editor; Backstab: Othello-like game; TheBar: \$10 Shareware displays icons of running programs; CloakIt: \$5 shareware cloaks all but active window. Color Software: Patriot Command: shoot the invading aliens game.

Stacks: Bartender's Dream: drink database; Math 4 Four: math drill and game; HyperPuzzle

More: Wolfman: full moon calendar; Zoom-bar: shrinks window to titlebar; Attention: controls dialogs from background programs; Eclipse: \$10 shareware screen blanker; Cube: Rubik-type game; Knockout: tiny breakout-type game; PB Sleep: makes PowerBooks yawn when it wakes up; RamDisk helper: autocoopies RamDisk files to hard disk.

Script-Central

- **Script-Central** is our special-interest disk for users of HyperCard Ilgs.
- **Script-Central** is our most advanced multi-media publication and a treat, originally created by Bo Monroe, that you shouldn't miss. Each issue opens on the street outside the "Script-Central Building." You knock on the door and are taken to the lobby, where you can admire the art on the walls, click the bell on the information desk, select an elevator that will take you to the issue's feature stacks; or walk through the "Regular Departments" door. Everything in **Script-Central** is accessed by moving around inside the building — question and answer, letters from readers, an introduction to the items on the disk written by the disk's editor, other news items (and don't forget to check out the Rumor-matic towel dispenser in the bathroom), and more than can be listed below. **What you see in these listings is merely the highlights of each disk.**
- Each issue of **Script-Central** consists of

two 800K 3.5 inch disks. This means that one issue costs ICON members \$6 and non-members \$10.

- Each issue of **Script-Central** contains 2 to 3 megabytes of files. You must have this much free space on your hard drive to install an issue. In addition, to view **Script-Central** you must have the most current version of HyperCard Ilgs, which we provide to new subscribers on the **Script-Central Starter Disk** (see below).

Starter Disk

All new subscribers to **Script-Central** receive the Starter Disk free. It is available to others for the standard fee (\$3 for ICON members, \$5 for others). The Starter Disk includes the latest version of Apple's HyperCard Ilgs.

Jan 1994 - 2 disks

Features: Star Trek: the Next Generation database of 3rd season's episodes; SoundMeister review; Guitar Chords; No Worries bug fix; resDir xfcn: lists all resources in a stack; StackRebuild 3.4; Slide puzzle game

Clip Art: children, cooking, medical.

Fonts: Alderney 9, 10, 12, 14, 18, 20, 24, 28, 36, 48.

Sounds: CommBleep, Twinklefade, Twinklefade Up, What!, 6 others.

Nov 1993 - 2 disks

Features: Hard Pressed and AutoArc comparison review; No Worries: keeps your files safe while kids use your computer; HyperJumble; HyperMaze; History of the Lisa computer; Star Trek: the Next Generation database of 2nd season's episodes.

Clip Art: Halloween, school books and supplies.

Fonts: Albuquerque 9, 12, 18, 24.

Sounds: bwong, fwoing, rewind, 4 more.

Sept 1993 - 2 disks

Features: KansasFest report; Star Trek: the Next Generation database of 1st season's episodes; Concentration game; Reviews of Express and The Manager; Four Clocks; Scream stack; Stack Rebuild v3.2; AboutWindow command.

Clip Art: sea shells and signs.

Fonts: Art Deco 9, 12, 18, 24, 36, 48; LED 24.

Sounds: Kind of Big, Oh No!, OoLaLa, Wow, and 15 others.

July 1993 - 2 disks

Features: The Creative Universe educational stack; PhoneMnemos: calculates all possible words for a phone number; HyperJumble game; Twilight II review; border-screen matcher; function key stack switcher.

Clip Art: fish, birthdays.

Fonts: LynzFont 12, 24, 36, 48, 72.

\$3 a disk (\$5 non-members)

Sounds: ZipOpen, IBMbeep, evil laugh, door creek, 8 others.

May 1993 - 2 disks

Features: Body Mass Calculator; Word Scrambler; First Ladies of the U.S.; Fortune Cookies II; xVolumes xcmd, lists online volumes.

Clip Art: school supplies, adventurer's gear, roses.

Fonts: Albatross 24, 36, 48, 72.

Sounds: flush, barks, cuckoo, long fanfare, close, As You Wish, Big Ben, 8 others.

March 1993 - 2 disks

Features: Led Zeppelin Discography; SmartQuotes, changes regular quotation marks to curly quotes and back; Fortune Cookies; Biorhythm II; import text script; Sounder \$5 shareware for moving sounds into stacks; SetPrefix xcmd.

Clip Art: spiders, kids, adult heads, landscape.

Fonts: OswaldBlack 24, 36, 48, 72; New York 24, 48.

Sounds: Click, laugh, zip, pop, Yes, dripdrip, 16 others.

Studio City (IlgS)

- *Studio City* is our special-interest disk for users of HyperStudio from Roger Wagner Publishing. We have a version for the Apple Ilgs and a version for the Macintosh (shown next).
- Each issue of *Studio City* includes letters from readers, an introduction to the items on the disk written by the disk's editor, news items, and more than can be listed below. **What you see in these listings is merely the highlights of each disk.**
- Each issue of *Studio City* for the Ilgs consists of two 800K 3.5 inch disks. This means that one issue costs ICON members \$6 and non-members \$10.
- *Studio City* may be installed on your hard drive if you like, but it will also run directly from the disks supplied. A starter disk is not required, since everything needed to view each issue is included as part of that issue.

December 1993 - 2 disks

Features: HyperIndex - complete index to all issues of *Studio City* for the Ilgs; PrintField NBA, Nate Trost; Egyptian Hieroglyphics, Ann Brundige; Illusions, David Pollock; Optical Illusions, David Harbach; Gravenstein User Group Home Stack; COWculatel, Bill Lynn; Scan & Match Sea Life, Bill Lynn.

Clip Art: holidays, parties, arrows, icons, M.A. Trzyna.

Sounds: bark, cow, cricket, dogs, frog, lamb, monkey, seal, sheep, turkey.

October 1993 - 2 disks

Features: Voyager Space Probe, Brett Thornton; Test Stack/Review Stack,

Phillip Williams; Guitarist's Friend, Ron Reames; New Frog and Fly, Bill Lynn.

Clip Art: reptiles, school II, space shuttle, M.A. Trzyna.

Sounds: bowmp, bwoing, floop.

August 1993 - 2 disks

Features: HyperStudio 3D, Michael Levine; Fossils, Robert Tighe; HyperChicago, Richard Davis; Radio Buttons & Check Boxes, Bill Lynn; Daffynitions, Ted Nicholas; Animals Animals Animals, Ron Reames.

Clip Art: animals (B&W), candy 'n' sweets, money, M.A. Trzyna.

Sounds: Apple boot up, Mac II power up, Tzap!, Dwoola!

June 1993 - 2 disks

Features: v32 NBA (displays 3200-mode art), Steve Chang; Baccarat Demo, Jim Johnson; Academy Awards, Bill Lynn & Allen W. McCoy; Paintbrushes, M.A. Trzyna; Exploring SimpleScript (Chunks), Bill Lynn; Daffynitions, Ted Nicholas; Quantum Numbers, Brett Thornton.

Clip Art: classic cars, fishes II, paint brushes, M.A. Trzyna; British Isles, Middle East, Western Europe, Michael Giltzow.

April 1993 - 2 disks

Features: Clipsters, Bill Lynn; 3D Studio, Richard Shafermeyer; Current Events, Joel Helton; Exploring SimpleScript (Easter Eggs), Bill Lynn; Metamorph, M.A. Trzyna; Halogens, Brett Thornton.

Clip Art: people, ribbons, hand tools, M.A. Trzyna.

Sounds: dripping, page turn, printer, scissors.

February 1993 - 2 disks

Features: Address Book, Jeff Rash; HyperGolf, Frank Harris; HyperHome, Bill Lynn; Ask the Guy/Ask the Kid, Dennis Windrim; Memory Helper Game, Ron Reames; Firearms Stack, Curtis Barrow.

Clip Art: children, rabbits, solar system, M.A. Trzyna; West Africa, South Africa, East Africa, Michael Giltzow.

Sounds: moof, Nil, claxon.

Studio City (Mac)

- Each issue of *Studio City* for the Macintosh consists of one 1.4 Meg 3.5 inch disk. It is not available on 800K disks.
- Each issue of *Studio City (Mac)* contains 2 to 2.5 megabytes of files. You must have this much free space on your hard drive when you open the self-extracting archive on each *Studio City* disk. Each disk includes everything you need to access the material on that disk, so there is no Starter Disk.
- Each issue contains feature articles, letters from readers, an introduction to

the items on the disk written by the disk's editor, news items, and more than can be listed below. **What you see in these listings is merely the highlights of each disk.**

- *Studio City (Mac)* will run on monochrome Macs, but is designed for color systems.

January 1994

Features: Magic Messages Tutorial, Nifty Title Techniques, and Egyptian Hieroglyphics, Ann Brundage; New HyperStudio Features.

Clip Art: Valentines, doors and windows.

Sounds: baby coo, baby cry, baby laugh, yawn, sigh, Help!

November 1993

Features: Noisy HyperMessages, Dean Esmay & Bill Lynn; Mac Clipsters, Bill Lynn; Navigation Palette, Bill Lynn; Toot Toot Tutor, Bill Lynn.

Clip Art: kids, dinosaurs, wild cats, toys, school.

Sounds: Count to five, four scissors clips, six drips, car starting, Imagewriter II, truck horn.

Quick clip: spinning globe

September 1993

Features: One Liners (jokes replace Tip of the Day), Bill Lynn; Trap the Mouse, Bill Lynn; Colorswitch shareware control panel, Andrew Welch; Exploring HyperLogo, Bill Lynn; HyperLogo Reference, Mike Westerfield; HyperFest Report.

Clip Art: Birds and pets, sea life, insects & flowers, M.A. Trzyna.

Sounds: Floop, Splat, Rewind, Bamp, Bwong, Fwoing.

Quick clip: four jet planes flying in formation

TimeOut-Central

- Each issue of *TimeOut-Central* consists of one 800K 3.5 inch disk. It is not available on 5.25 inch disks.
- To use *TimeOut-Central* effectively, you must own AppleWorks and one or more TimeOut modules, preferably UltraMacros. All of the material that appears on *TimeOut-Central* is about AppleWorks and is in AppleWorks files. Since those who don't already own AppleWorks will have no interest in this publication, there is no Starter Disk for *TimeOut-Central*.
- Each issue contains feature articles, bug reports, letters from readers, an introduction to the items on the disk written by the disk's editor, news items, and more than can be listed below. **What you see in these listings is merely the highlights of each disk.**

January 1994

Features: Columnist: converts text into multiple column files; Loan Calculator;

Footnoting macros; LaserJet III SEG.ER file; Reverse Linefeed and DB Highlighter macros; Randy's free patcher for AppleWorks 4.0; 1993 spreadsheet U.S. income tax template; new Afterwork module; AppleWorks 4.0 icons; Full text of Oct-Nov-Dec A2-Central.

November 1993

Features: DBPix, adds graphics capabilities to AppleWorks database; AppleWorks Hangman game with sounds and animation; Five custom dictionaries, medical, biological, microbiological, computers, and "huge"; Conversion program for Sensible Speller dictionaries; custom codes for Deskjet 500 printers; Auto-hyphenation macro update; Nelken's Ultra-to-the-Max tutorial, Lesson 15. Full text of September A2-Central.

September 1993

Features: Rubino's hyphenation macro, Change-A-File and Resurrection club conversion and repair utilities; club membership database; TCXpress macros for accessing GEnie with TimeOut TeleComm; macros for downloading custom fonts to the ImageWriter II, chemistry reaction simulation, Nelken's Ultra-to-the-Max tutorial, Lessons 13 & 14; Texas II, issues 3.2, 3.3, & 3.4, Full text of July-Aug A2-Central.

July 1993

Features: AppleWorks 4.0 announcement, Formula Writer, create math formulas with SuperFonts; Barrows Utilities; AppleWorks Educator files; Nelken's Ultra-to-the-Max tutorial, Lessons 11 & 12; 16 fonts for SuperFonts or TimeOut Paint; shareware dot command extractor and compiler for UltraMacros; Copyclip, copies selected screen image to clipboard; SetPath, sets default path embedded in files.

May 1993

Features: Quick Calendar; Perpetual Calendar; AppleWorks Control Panel, patch AppleWorks on the fly; Case changer; TO.Freespace, shows size of current file and freespace on all disks; Clipboard viewer for DoubleData; Database information linker; Computerized testing and scoring; Nelken's Ultra-to-the-Max tutorial, Lessons 9 & 10; Texas II 3.0 and 3.1.

March 1993

Features: Payroll templates; UltraMacros 4.1 to 4.2 updater; FileCount init, shows number of files on desktop at add files screen; TO.Cellmover; Canadian tax templates; Nelken's Ultra-to-the-Max tutorial, Lessons 7 & 8.

Best Sellers

Legal highs!

Between February 1985 and June 1993 Resource Central published **A2-Central** as an 8-page paper newsletter (the disk version began in February 1989). We can send you all eight-and-a-half years worth of our paper newsletter — 102 published issues — for just \$29.95. *This is less than the \$34 we used to charge for a single year's subscription.* These issues are bound in annual volumes and indexed. Until recently, the cost of a full set of back issues was \$49.95. Here's part of a recent letter we received from a subscriber:

A few weeks ago I spent the best fifty bucks of my life on the complete Open-Apple/A2-Central back issues set. Nowhere have I found such a complete and thorough history of the Apple II. And, as an added bonus, you managed to cram thousands of useful (and fun) tips into each issue. The journal format, unadulterated by messy advertising, is a joy to read. I look forward to the end of each month when I will receive my latest issue of A2-Central and get one of the best legal highs on the planet. — Michael Chinn, Caro, Michigan.

Also, during the first six months of 1993 we published a paper version of a newsletter called **Fishhead's Children** designed for people who use more than one kind of computer. The first five issues examine the differences between Windows and the Macintosh, the sixth covers the fundamentals of MS-DOS. These are available in a set for \$14.95.

A2FS Full Set of A2-Central on paper \$29.95
FHFS Full Set of Fishhead's Children \$14.95

Memory Cards

Nothing satisfies like ample memory. This year you can afford to get ample extra memory for any Apple II. Our best-selling 4-meg memory card for the Apple IIgs is just \$129.95 — about \$30 a megabyte, including the card! Made by Sequential Systems, this is the highest quality, least expensive IIgs memory card on the market. Meanwhile, Sequential's 1 meg cards for the IIe and IIc work with AppleWorks, as a RAM drive, and are just what you need for your Apple II.

SQ-001 RAM-GS 4 Meg card for IIgs \$129.95
SQ-002 Meg-80Z 1 Meg card for IIe \$79.95
SQ-007 RAM-IIc 1 Meg card for IIc \$169.95

System 6 Manual

The Apple IIgs System 6 User's Reference is Apple's official 392-page guide to System 6. All about the Finder, Control Panels, the Archiver, the Advanced Disk Utility, Universal Access, and Multimedia devices.

DA-047 System 6 User's Manuals \$34.95

GNO/ME

Now you can learn UNIX in the privacy and warmth of your own computer room. **GNO/ME** is a UNIX-like multitasking system for the Apple IIgs. Implemented as an extension to GS/OS, GNO switches between programs 60 times a second. You will be able to run one desktop program along with any number of text applications. Distributed along with GNO/ME is a growing UNIX compatibility package. This allows you to learn UNIX and compile many BSD UNIX programs on your own Apple IIgs.

PR-001 GNO/ME \$89.00

ProTerm v3.1

This version of the cadillac of Apple II telecom programs includes features such as the ability to restrict how much memory goes to scrollback, new macro commands, direct support of 57,600 bps on the IIgs, cursor position maintenance when entering and exiting the editor and scrollback, and hundreds of other enhancements. **Now's the time to get the best if you're still using other telecom software.**

IS-003 ProTerm v3.1 \$85.00

3D-Logo & HyperLogo

If you know anything about Logo, you know it's widely used for teaching logic, sequential thinking, and creativity in elementary schools. It's a language that's easy enough for kids, yet is directly related to powerful artificial intelligence languages like LISP.

3D-Logo and **HyperLogo**, from the Byte Works, are the first new versions of Logo to appear for the Apple

II series in years. They advance the state-of-the-art in Logo in several areas. First, **3D-Logo** has a standard IIgs desktop interface. **HyperLogo**, on the other hand, works from inside **HyperStudio**. The drawing turtle not only moves forward and back, but also toward and away from the user (thus, these are 3-Dimensional Logos). A movie-making function allows you to create animations that can be played back from within Logo or elsewhere. The Byte Works' Logos come with a demonstration program of spinning molecules that was written in an afternoon. This one is hot!

BW-014 3D-Logo for the IIgs \$59.95
BW-015 HyperLogo for the IIgs \$59.95

AppleWorks 4.0

Enjoy the power and flexibility of AppleWorks 4.0, the brand-new upgrade to the Apple II's all-time greatest program! Now can have more files on the desktop, more fields in database records, and literally hundreds of other new features. Features such as auto-save, built-in UltraMacros player and support for HP Deskjet printers, split-screen and glossary functions in the word processor, and 3D spreadsheets.

Programmed by a team lead by our own **TimeOut-Central** editor, Randy Brandt (who was also on the AppleWorks 3.0 upgrade team), AppleWorks 4.0 is the ultimate program for the Apple II series. Compatible with any 128K Apple IIe or better, AppleWorks 4.0 remains true to its heritage.

For pricing, see **AppleWorks** listing on the next page.

Lost Treasures of Infocom

This is an **entire library** of the best adventure games ever published. You get 19 games: *Zork I, Zork II, Zork III, Beyond Zork, Hitchhiker's Guide to the Galaxy, Deadline, Witness, Suspect, Ballyhoo, Suspended, Infidel, Lurking Horror, Starcross, Sorcerer, Moonmist, Planetfall, Stationfall, Enchanter, and Spellbreaker* — all in one package. You get all the text from the original manuals in one 269-page book (including the original illustrations); complete maps of each game, and a **big 344-page hint book that will help you solve puzzles when you get stuck.**

BR-125 Lost Treasures of Infocom (IIgs) \$59.95

Books
 AW-010 Apple: Applesoft Tutorial (w/disk) \$29.95
 AW-021 Apple: Applesoft Programmer's Reference \$22.95
 AW-040 Critchfield/Dwyer: Bit of Applesoft \$9.95
 AW-039 Myers: Graphics for the Apple II \$9.95

Tools

MD-005 BASIC Programmers Workshop \$99.95
 MD-004 ModemWorks v3.0 / OMM \$79.95
 BB-002 Beagle Compiler (Applesoft compiler) \$59.00
 BB-003 Program Writer (Applesoft program editor) \$37.50
 DA-001 Apple: Apple Filecard Toolkit \$19.00

Pascal

DA-024 Apple: Apple II Pascal v1.3 \$69.00
 DA-032 Pascal LabPak (10 3.5 disks, no docs) \$69.00
 DA-044 Apple: Pascal Technical Notes \$4.00
 DA-003 Apple: Apple II Pascal Desktop Toolkit \$30.00
 DA-001 Apple: Apple Filecard Toolkit \$19.00

Other languages

DA-004 Apple: Apple II SuperPILOT \$69.00

6502 assembly language

RW-001 Wagner: Assembly Lines: The Book \$19.95
 DS-004 disk for this book \$15.95
 AW-012 Finley: Asm Lang for Applesoft Prgmrs \$18.95
 CB-010 Mansfield: Apple Machine Lang Beginners \$18.95
 DA-001 Apple: Apple Filecard Toolkit \$19.00
 DA-025 Apple: Desktop Toolkit \$30.00

Apple DOS 3.3

QS-004 Beneath Apple DOS \$12.95
 DA-022 Apple: DOS 3.3 User's Manual w/ disk \$20.00
 DA-023 Apple: DOS 3.3 Prog. Manual w/ disk \$20.00
 AW-038 Wintermeyer: Applesoft Toolbox \$9.95

ProDOS 8

QS-001 Beneath Apple ProDOS \$12.95
 QS-005 Supplement for ProDOS 1.2 & 1.3 \$9.95
 AW-024 Apple: BASIC Prog with ProDOS (w/disk) \$29.95
 AW-023 Apple: ProDOS 8 Tech Ref (w/disk) \$29.95
 DA-040 Apple: File Type Technical Notes \$25.00
 DA-021 Apple: Apple SCSI Card Utilities \$30.00

IIgs Programming

8/16-Central

ES-FS All back issues (20 disks at \$3.95 each) \$59.95

Technical manuals

GS/OS
 AW-026 Little: Exploring GS/OS and ProDOS 8 \$21.95
 DS-006 disk for this book (3.5) \$15.00
 AW-041 Apple: Apple IIgs GS/OS Reference \$28.95
 DA-027 Apple: GS/OS Device Driver Reference \$29.00
 BW-012 Byte Works: Prgmrs Sys 6.0.1 Ref \$49.95

Technical references

MH-001 Fischer: Apple IIgs Technical Reference \$19.95
 DA-046 Apple: Complete Set of Apple Tech. Notes \$65.00
 DA-042 Apple: Apple IIgs Technical Notes \$30.00
 AW-018 Apple: Technical Intro to the Apple IIgs \$9.95
 AW-011 Apple: Programmer's Intro to IIgs (w/disk) \$32.95
 AW-022 Apple: Apple IIgs Firmware Reference \$24.95
 DA-026 Apple: Apple IIgs Firmware Ref 3.0 Update \$12.00
 AW-002 Apple: Apple IIgs Hardware Reference \$26.95
 AW-001 Apple: Apple Numerics Reference \$29.95
 AW-014 Apple: Mac Human Interface Guidelines \$29.95

Toolbox manuals

CB-005 Gookin/Davis: Mastering the IIgs Toolbox \$19.95
 CB-007 Gookin/Davis: Adv Prog Tech IIgs Toolbox \$19.95
 AW-019 Apple: Apple IIgs Toolbox Reference, Vol 1 \$26.95
 AW-006 Apple: Apple IIgs Toolbox Reference, Vol 2 \$26.95
 AW-036 Apple: Apple IIgs Toolbox Reference, Vol 3 \$39.95
 BW-012 Byte Works: Programmers Ref for Sys 6.0.1 \$49.95

High-level language tools

Logo
 BW-014 3-D Logo for the IIgs \$59.95

Pascal
 PG-001 Pegasus Pascal Precompiler was \$65! \$49.95
 BW-001 ORCA Pascal Compiler for IIgs \$90.00
 BW-002 Learn to Program in Pascal \$50.00
 BW-011 Toolbox Programming in Pascal \$75.00

C
 BW-003 ORCA/C Compiler for IIgs \$90.00
 BW-004 Learn to Program in C \$50.00
 BW-013 Toolbox Programming in C \$75.00

Assembly language tools

Books
 CB-002 Wagner: IIgs Machine Lang for Beginners \$19.95
 DS-005 disk for this book (3.5) \$15.95

Assemblers & Disassemblers
 RW-002 Merlin 8/16 (DOS 3.3, ProDOS 8, GS/OS) \$99.00
 BW-005 ORCA/M Assembler v2.0 \$90.00
 BW-008 Merlin to Orca Source Converter \$18.00
 BW-007 ORCA Disassembler \$30.00

Debugging Tools
 BW-010 ORCA Debugger \$39.95
 DA-015 Apple: GS Bug and Other Debugging Tools \$30.00

Universal development tools

BW-006 Design Master (Resource Creator) \$57.00
 BW-009 Talking Tools (text to speech pkg) \$49.95
 DA-020 Apple: Apple IIgs Source Code Sampler \$20.00

MPW Cross-Development Suite

DA-037 Apple: APW/MPW Interfaces for System 6.0.1 \$20.00
 DA-019 Apple: MPW IIgs Tools v1.3 \$50.00
 DA-016 Apple: MPW IIgs Assembler v1.2 \$99.00
 DA-017 Apple: MPW IIgs C v1.0.2 \$99.00
 DA-018 Apple: MPW IIgs Pascal v1.1 \$99.00

Binder for APDA products
 RC-108 3-Ring Binder \$17.95

Apple II Tech Help on GENIE!

The Apple II Programmers and Developers RoundTable on GENIE is the most active spot you'll find for help with your programming problems. Meet other programmers in our bulletin boards and on line conferences! Download our developer-oriented notes and tools!

payment: Have your credit card number ready
 Set-up: Half Duplex (local echo) 300, 1200, or 2400 baud
 Dial: 1-800-638-8369
 At connect, enter: HHH
 At the "U#=" enter: XTX99020,A2PRO (no spaces) and press RETURN
 Need help? GENIE customer service (voice) 1-800-638-9636
